Note:

1. Exceedance of the USEPA Site Specific Trigger Level for silica at Station 5 [Firehouse #10 (roof level)] occurred on Friday, June 26, 2007. Fugitive emissions likely attribute to one or more off site properties directly impacted silica concentrations. After review of all of the information including meteorological data, PM10 measurements, site activities logs and off site visual observations it has been determined that the silica exceedance measured at Station 5 on June 26, 2007 was not attributable to work activities at 130 Liberty Street.
